SUMMARY

A Full Stack Web Developer specializing in React and GraphQL integration.

MAIN TECHNICAL SKILLS: JavaScript, React, GraphQL, AWS, Redux, Apollo, Node, CSS, SQL
LANGUAGES: Native & Fluent in Hebrew and English.

EXPERIENCE

Bit Pharma, *Full Stack Engineer*, San Francisco, California   2018 - Current
Bit Pharma is an ambitious startup that aims to help channel funds into medical research. My role in the team is to help drive the development of a website that facilitates investments and provides an accurate and concise picture of the state of emerging research projects.

Technical Work:
  • Engineered the back-end by employing GraphQL on Amazon AWS's Appsync, Cognito, as well as Lambda and S3 services.
  • Built the front-end using Apollo, Amplify, and React.

Payoneer, *Customer Service - Social Media Specialist*, Tel Aviv / New York City   2015 - 2017
  • Slashed customer handing times by 25% by developing script processes to automate customer service representatives' workflow.
  • Achieved over 90% on client satisfaction while reaching approximately 100 clients per day.
  • Promoted to Social Media associate, advancing and safeguarding the company brand online.
  • Trained and mentored new associates.

Yarden, Inc., *CEO*, Tel Aviv, Israel   2012 - 2015
  • Initiated a tourist rental business through then-emerging sharing economy websites.
  • Expanded from hosting guests in an extra room in a student apartment to a business with 5 directly managed apartments.
  • Supervised employees under direct management.
  • Operated business marketing, logistics, and coordinated with multiple clients and businesses.

PROJECTS

Acroyoga Pose Finder   2017 - Current
Constructed a mobile first Full Stack, Progressive SPA for the Acroyoga community, helping practitioners find poses to perform on the go. Includes swiping functionality, user favorites and token authentication. Built with Node Express, PostgreSQL, and React with Redux.

Site Generator   2017
Designed an interactive website for setting up personal business card page for visitors. Built with React, Node, Express.js and PostgreSQL.

SoundLand   2017
A collaborative project that aims to connect users based on their location and musical preference.
Built with Node Express, PostgreSQL, React.

Simon Says   2017
Recreated the Simon Says game entirely out of JavaScript constructors, using industry standard ES6 syntax. Built with HTML, CSS, jQuery and ES6 Javascript.

Shlomit National Service, *Tutor*, Acre, Israel   2009 - 2010
Volunteered at the "Manof" Boarding school for at-risk youth.

Kav Laoved, *Consultant*, Tel Aviv, Israel   2009 - 2009
Volunteered at a Foreign Workers' rights organization to provide aid to disadvantaged foreign workers.

EDUCATION

General Assembly Web Development Course   2017 - 2017
Completed 400 hours of in-class & workshop instruction in full-stack web development. Launched three full-stack web applications using relevant and in-demand technologies. Applied industry best practices in a collaborate working environment.

Tel Aviv College   2014 - 2015
Completed courses in C Programming and Data Structures Management.
